- Modern tools for marketing activities
- 24-hour availability, swift order delivery, and convenient and secure payment methods
- Great potential for fostering loyalty and adopting advanced promotional policies

Efficient Solutions / Based on Top Technologies

Customer Reviews / Testimonials

The solution significantly organizes and broadly makes the data available, which is consolidated, standardized and properly aggregated, to other platforms and product information recipients within the Selena Group.

The Unity Group team operates according to modern project management principles and adapts them according to needs. We work on a partnership basis, thanks to which we work in the spirit of teamwork and solve challenges that arise from week to week. We work openly and treat each other according to the WIN-WIN principle.

Krystian Stawiński
Group Innovation Manager, Selena Group

Unity Group has a skilled team of engineers. Obstacles are not roadblocks in the solution development process. During the preparation of the solution, we got to know each other's competences. Problem solving is based on cooperation. Unity Group's team supports us in maintaining the system, offering help in designing new functionalities, and suggesting solutions that best fit AWS architecture.

domiporta

Stawomir Cichoń
Head of IT, domiporta

Currently, the system enables the entire company to work and is actively used, as evidenced by the number of documents created from the day of commissioning. These are respectively 60,000 invoices, 2,800 requisitions and 2,400 orders.
